Foundation subject: Design Technology

Intent

Design and Technology at Little London is an inspiring, rigorous and practical subject. It encourages children to learn to think and intervene creatively and to solve problems both as individuals and as members of a team. At Little London, it is our vision that children will use their creativity and imagination, to design and make products that solve real and relevant problems within a variety of contexts, considering their own and others' needs, wants and values.

Implementation

The teaching of Design Technology at Little London is delivered through termly projects. Our Design Technology curriculum covers a range of skills through our main elements: 1) Food, Structures, 2) Textiles and 3) Mechanisms and Electrical.

At the end of every unit, children will have researched, designed and created a high quality end product following a clear design brief.

SMSC is promoted in Design Technology as we prepare pupils for opportunities, responsibilities and experiences of later life.
